

CAPABILITY STATEMENT

US Infrared Inspections provides a full spectrum of thermal imaging, gas leak detection, ultra-sound and building envelope inspections, performed by ITC Certified Infrared Inspectors. We focus on customer care: scheduling, real-time imaging and correspondence. Our staff's 150 years of combined knowledge and in-depth experience are added values to our growing team. We achieve this through on-going periodic training, attention to detail and accurate reporting. Our teams of Certified Thermographers and Master Electricians are highly skilled, knowledgeable and experienced in seeking, finding and investigating complex hazardous, electrical or mechanical problems. We provide certified criticality reports and system analysis to ensure your environment maintains a high level of performance and safety.

CORE COMPETENCIES

- Building Envelopes
- Roofs
- Solar Panels
- Generators
- Electrical Distribution Centers
- Motors/Motor Control Centers
- Energy Conservation
- Gas Piping and Storage
- Boilers/Chillers
- Ultra-Sound
- Automation and Assembly
- Drone Inspections
